The CableMaster series is a must-have for any installer and repair technician enabling them to find and eliminate the most common faults before running an extensive certification test.

OPTIONAL ACCESSORIES

Accessories	
	CableTracker Tone Probe The Softing IT Networks cable tracker helps to identify cables (only unshielded cables) or termination points. Article No.: 226007
	7 Remotes The 7 Remotes can be used as extra Remotes when testing networks and for port identification. Cannot be combined with CableMaster 400 Article No.: 226508
	Data Remote Set ID/MAP 19 data (twisted pair) cables or data ports/jacks at one time. Numbered custom RJ45 Remotes 1 thru 19 for easy identification. A real time saver! Article No.: 226506
	Handy Carrying Pouch incl. a shoulder strap (incl. in CableMaster 600/650 kit) Article No.: 226042
	Cable test Pro Pack Accessory package consisting of: Set of coaxial remote detectors (19), set of RJ45 remote data detectors (19), RJ45 adapter / crocodile clip, 2 RJ45 connection cables, practical carrying case Article No.: 226545

CABLEMASTER 200

The smallest representative of the CableMaster series is an economic, compact continuity and wiring tester for Ethernet cabling. While its ergonomic design makes this handheld tester easy and efficient to use, its large LCD screen displays the results in the form of icons and messages that are easy to understand.

DESIGN FEATURES

- Compact size
- Very easy to use
- Detachable remote unit to test long cables
- Tests cable lengths of up to 304 m
- The tone generator can be used for tracing cables with a tone probe (optional accessory)
- Easy to read LCD screen with icons displaying all test results, including PASS or FAIL indication
- Displays cable faults if cable wiring does not conform to TIA568 specifications

CABLEMASTER 400

The CableMaster 400 is the ideal tester to get accurate test results in the field very quickly. It tests network, telephone and coax cables for shorts, opens and split pairs. The integrated flexible remote unit allows for a quick detection of any miswiring and displays it in a wiremap format with connector pin numbers.

DESIGN FEATURES

- Tests voice (6-wire), data (8-wire), and video (coax) cables
- Tests and indicates pins with shorts, opens, miswires, and split pairs
- Tone generator has a user selectable tone which is applied on selectable pins
- Easy to read, extra large LCD screen with large icons
- RJ Master Remote (voice & data) stores in the bottom of the main unit
- Cable identification locates up to 19 cables (data, voice, and video)

CABLEMASTER 500

The CableMaster 500 is the ideal tester to get accurate test results in the field very quickly. It tests network, telephone and coax cables for shorts, opens and split pairs. The integrated flexible remote unit allows for a quick detection of miswiring and displays it in a wiremap format with connector pin numbers. The CableMaster 500 features additional length measurement on top of the cable testing capabilities offered by the CM 400 which enables the user to determine the exact distance to the fault (open).

DESIGN FEATURES

- Tests voice (6-wire), data (8-wire), and video (coax) cables
- Tests and indicates pins with shorts, opens, miswires, and split pairs
- Tone generator has a user selectable tone which is applied on selectable pins
- Easy to read, extra large LCD screen with large icons
- RJ Master Remote (voice & data) stores in the bottom of the main unit
- Cable identification locates up to 19 cables (data, voice, and video)
- Determines cable length and reports the location of an open or unterminated cable
- Illuminated display
- Flashlight
