

One for all: Certification and troubleshooting of copper and fiber optic LAN cabling

WireXpert - One for all

WireXpert 500 (copper tester) from 6,595 euro*

WireXpert 500 (fiber certifier) from 8,115 euro*

Upgrade quickly and easily per license key for

WireXpert 500 plus (copper & fiber optic tester) from **12,415 euro***

WireXpert 500 is an affordable cable certifier for twister pair cabling systems up to CAT 6 A / Class EA. Using the **WireXpert 500**, electrical fitters can quickly and easily measure their data cabling and document the quality of their work.

As well as twisted pair cabling, industrial ethernet M12, M12 x-coded systems, coax cabling and patch cables can be measured.

The **WireXpert 500** has a color LCD screen with an intuitive user interface and clearly legible display. With the innovative Dual Control System (DCSTM), consisting of a main unit and a remote unit, it's a simple matter to carry out the measurement series, and the transit times for measurements are considerably reduced.

The advantages of the **WireXpert 500** include the professional report creation on PC and the high accuracy of the measurements taken using precision measurement hardware, which is confirmed by independent, world-renowned testing laboratories (such as ETL).

Functional characteristics

- Cutting edge cabling certification up to 500 MHz
- Possibility to update to 2.5 GHz for measurements in accordance with CAT 8
- Certified in accordance with: Class D / E / EA & Category 5 / 5e / 6 / 6A standards
- Fulfills precision requirements in accordance with ISO/IEC Level IIIe
- Optical measurement adapters available for single mode and multimode
- Certification of patch cables
- Measurement of industrial ethernet M12 cabling
- eXport PC software for simple creation of comprehensive reports and documentation

Safely into the future

WireXpert 500 can be expanded to a frequency range of up to 2.5 GHz by way of a software update, thereby fulfilling all requirements with respect to CAT 8.

Upgradeable:

As of now, there are three **WireXpert 500 variants** to choose from - pick the one that is best suited to your field of work: **Softing IT Networks** offers you the choice between a CAT 6 A copper tester, a pure fiber optic tester, or a CAT 6 A copper tester and a fiber optic tester combined in a single device. The **WireXpert 500** series adapts itself to your projects. All models can be upgraded, so that you don't need a whole new device when your requirements change. If you're already testing copper and fiber optic today, **WireXpert 500 Plus** is the right choice.

The new WireXpert 500 series grows with your requirements through flexible upgrades.

Service and Support:

You can depend on **Softing IT Networks** expert and reliable service. We don't leave you on your own: you can contact our capable service staff in Germany and they will be happy to help when you don't know what to do next. We are known among our customers for our comprehensive service, and we also offer you a comprehensive maintenance agreement with XpertCare.
