

eXport Cloud *Enterprise*

connect it. own it.

CLOUD

FOR THE WIREXPERT SERIES

IT Networks

With **eXport Cloud Enterprise** you operate your own cloud based platform for the exchange of measurement data and measurement lists of your WireXpert series.

Project managers can use this software to obtain measurement data from various installation teams via the Internet and to control measurement projects using LBT files (List-Based-Testing).

INTERNET

eXport

RECEIVES measurement data **AND**
SENDS measurement lists (LBT files)

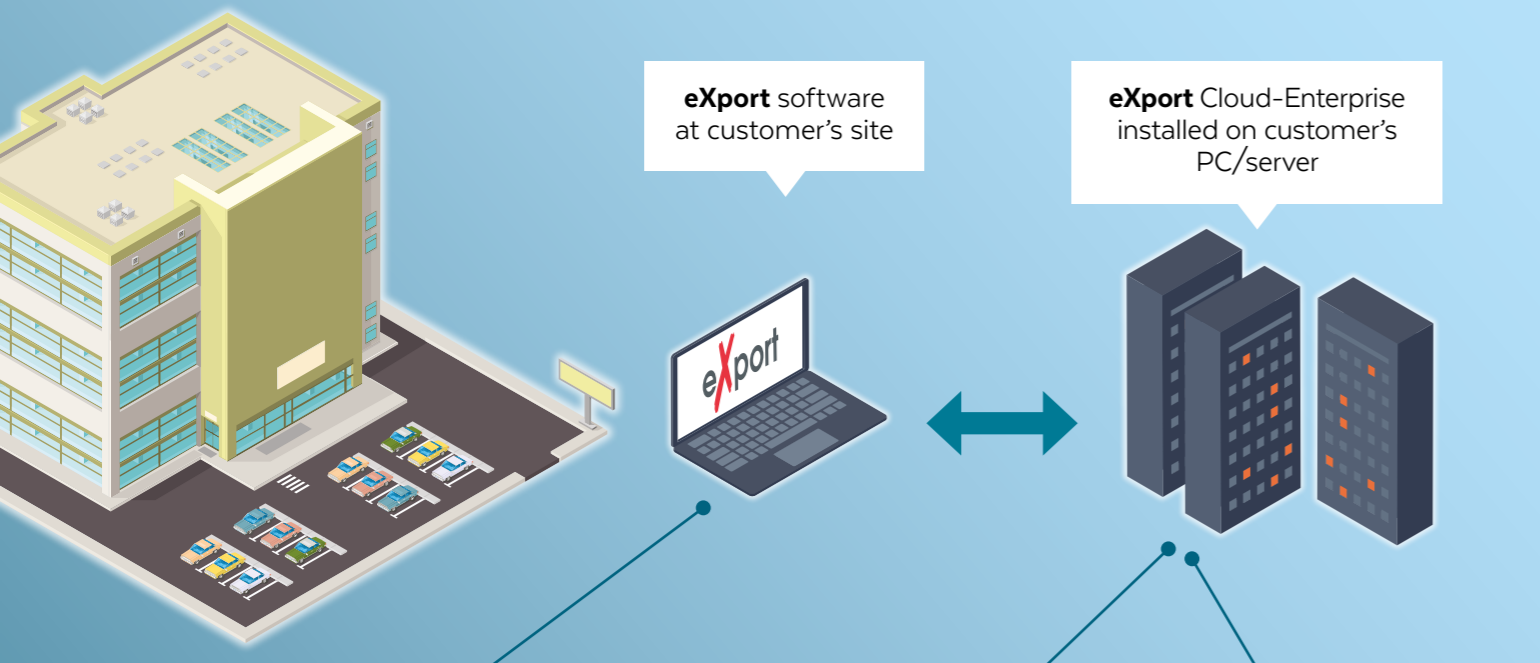

WireXpert

SENDS measurement data **AND**
RECEIVES measurement lists (LBT files)

This solution makes you completely independent of third-party cloud services, as you run the server software on your own IT infrastructure. You are in control of your data at all times, as you are always in possession of the data and the data do not have to be stored on external servers.

HEAD OFFICE

CONSTRUCTION SITE

There are **no recurrent monthly costs**, unlike with SaaS products (Software as a Service).

Only minimum hardware requirements on your enterprise network need to be fulfilled. The hardware required is a commercially available minicomputer or a laptop with Windows 10.

Unique: eXport Cloud Enterprise is installed in your enterprise network and is therefore **not dependent on a third party**.

The customer owns the software, all measurement data are stored **in your own network**.

The WireXpert can use common access points or smartphones with a hot spot function to connect to the internet.

Any number of WireXpert devices or of users can be connected by an eXport Cloud Enterprise installation.

All WireXpert devices can be upgraded with this feature.

SYSTEM SPECIFICATION		
ITEM	DESCRIPTION	NOTES
Supported Operating Systems	<ul style="list-style-type: none"> Windows 10 Professional 32-bit or 64-bit Windows 7 Professional 32-bit or 64-bit 	<ul style="list-style-type: none"> Support for server versions of Microsoft's operating system will be available in future releases <ul style="list-style-type: none"> Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2
Hardware Prerequisites	<ul style="list-style-type: none"> Minimum 1 GB of free disk space for Installation 8GB of RAM Intel i5 or i7 Processor
